Session 30
Focused Trading Practice

A.Rashmi
II B.Com(Honours)

Introduction

The purpose of this exercise is to identify good and poor trades, learn from previous mistakes, and improve trading decisions. It helps me follow a trading plan and make better entry and exit decisions.

Good Trade Evaluation

I selected Trade No. 2 as a good trade. I bought BTCUSD at $81,640 and sold it at $85,179 with a profit of $35.39 and a return of 4.33%. From this trade, I learned to follow the long strategy, wait for the expected price movement, and close the trade at the right time to earn a profit.

Poor Trade Evaluation

Some of the previous trades had very small profits. This happened because the entry confirmation and profit target could be improved. From these trades, I learned to wait for stronger confirmation before entering and to plan the entry and exit clearly.

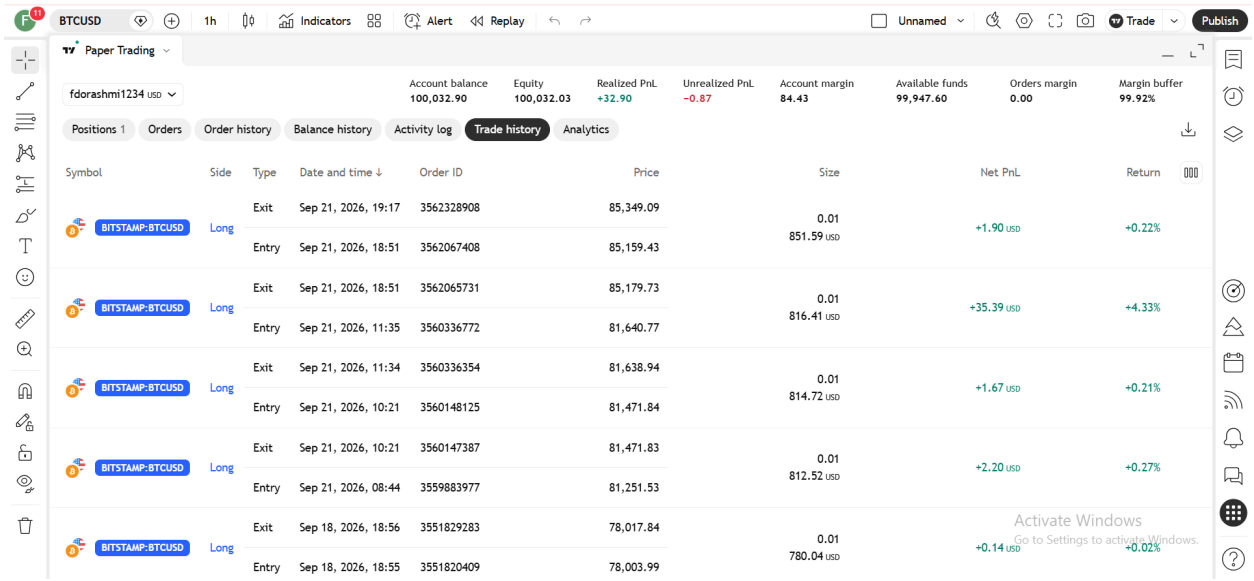

Focused Trading Report

In this session, I executed 5 focused trades using the Combined Strategy. All the trades were BTCUSD long trades. I planned the trades before entering and followed the trading plan. I also avoided previous mistakes and closed all 5 trades with profit.

Overall Reflection

I have improved because I followed the trading plan and avoided previous mistakes. All 5 trades ended in profit, but some trades had very small profits. In future trading, I will improve my entry timing, wait for stronger confirmation, and set clear profit targets to make better trading decisions.
